

DATA & AI ROADMAP ADVISORY SERVICE

From Vision to Action: Do you have a vision for how data and AI can transform your organisation, but lack a clear plan to get there?

Many organisations recognise the potential of data and AI but struggle to translate that potential into reality. A well-defined data roadmap is essential for turning a vision into actionable steps, ensuring that data initiatives deliver tangible business value.

DESIGNING YOUR DATA-DRIVEN FUTURE

Cybit, in partnership with Keyrus, offers a Data & AI Roadmap Design Service to help you create a clear, practical plan for leveraging data and AI to achieve your strategic objectives.

We combine our deep understanding of your business with Keyrus' expertise in data architecture and technology consulting to provide you with a roadmap that is both ambitious and achievable.

This service helps define a future data and AI state that aligns with your business goals and outlines the specific steps you need to take to get there. We focus on delivering value quickly while building a scalable and sustainable data and AI capability.

KEY DELIVERABLES

- A clear, actionable data and AI roadmap
- A shared understanding of your data and AI vision
- A plan for delivering short-term wins and long-term value

KEY FEATURES AND BENEFITS

Our service provides a comprehensive data roadmap, including:

- 1 Data & AI Vision**
We work with you to define a clear, business-oriented vision for data and AI.
- 2 Future State Design**
We define the target data architecture, capabilities, and organisation you need to achieve your vision.
- 3 Roadmap Development**
We create a prioritised plan with specific projects, timelines, and resource requirements.
- 4 Change Management**
We help you plan the people and process changes required for success.

WHY CYBIT?
