ASSESSMENT

SOPHOS

Threat Profile Assessment
Powered by Sophos

For a limited time, we are offering exclusive access to a free 'Threat Profile Assessment' from our strategic partner, Sophos. This quick, powerful scan reveals exactly what cybercriminals can see about your organisation – and where you might be exposed.

What Does This Mean For Your Organisation?

In today's digital landscape, understanding your external attack surface is no longer a luxury, but a necessity.

Our non–intrusive investigation provides a unique and invaluable insight into your company's digital footprint from an attacker's perspective. This allows us to help you understand your areas of greatest risk, and, more importantly, how to effectively address them before they are exploited.

We empower you to move from a reactive to a proactive security posture.

CYBIT

SOPHOS

WHAT YOU WILL RECEIVE

Our comprehensive assessment provides a detailed report on your organisation's exposure, including:

Exposed Email Addresses & Leaked Credentials: We identify company email addresses exposed in third-party breaches and whether credentials are traded on the dark web. Critical for preventing credential stuffing, phishing campaigns, and account takeover.

Suspicious Domains Linked to Your Brand: We uncover malicious domains impersonating your brand used in phishing attacks against employees, customers, and partners. We identify these so you can take action to protect your reputation and stakeholders' trust.

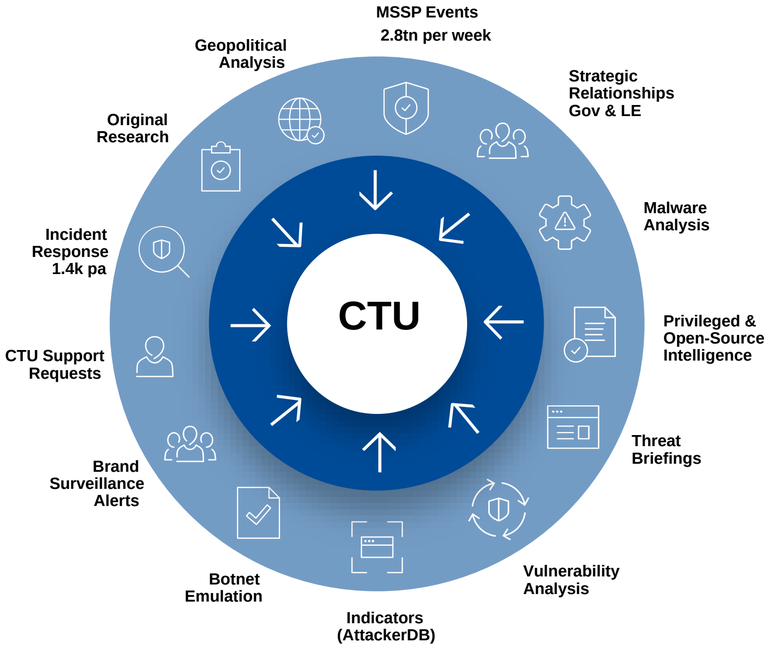
Dark Web Exposure of Key Contacts: We search the dark web for mentions of executives and IT administrators. This reveals if their information is being traded by cybercriminals, indicating potential targeting for sophisticated attacks.

KEY DELIVERABLES

- OSINT-powered assessment using Sophos threat intelligence from media, forums, conferences, and social media.
- Automated scanning with expert analysis identifying suspicious domains, leaked emails, exposed credentials, and external vulnerabilities.
- Personal review with dedicated account manager

KEY BENEFITS

1. **Threat Intelligence Powered:** Leverages Sophos's world-class OSINT from media, forums, conferences, and social media to identify vulnerabilities before exploitation.
2. **Comprehensive Scanning:** Combines automated scanning with expert analysis to investigate suspicious domains, leaked emails, exposed credentials, and external vulnerabilities.
3. **Proactive Defence:** Identifies potential attack vectors including brand impersonation domains, credential exposure, and dark web trading of executive information.
4. **Expert Analysis:** Professional review of findings with actionable recommendations to improve security posture.
5. **Fast & Free Assessment:** Quick turnaround with personal review by dedicated account manager. Limited spaces available.



WHY CYBIT?

Choosing the right partner for your Threat Profile Assessment is crucial. Here's why Cybit stands out:

✓ **MicrosofSophos Strategic Partnership:** Cybit partners with Sophos to deliver world-class threat intelligence powered by OSINT capabilities across key areas:t Solution Partner Specialisations:

Cybit holds Microsoft Solution Partner specialisations across key areas:

- Open-Source Intelligence
- Dark Web Monitoring
- Threat Analysis
- Brand Protection

This demonstrates our deep expertise and commitment to delivering best-in-class cybersecurity solutions.

✓ **Proven Experience:** With over 30 years of experience in managing and supporting customers across the UK, Cybit has a long and successful track record. We understand the unique challenges and opportunities faced by UK businesses.

✓ **Deep Understanding of Threat Intelligence:** Our team possesses in-depth knowledge of threat intelligence methodologies, ensuring that we can identify even the most subtle attack vectors and vulnerabilities.

✓ **Customer-Centric Approach:** We work closely with you to understand your specific needs and tailor our assessment to your unique requirements. We are committed to providing exceptional service and building long-term partnerships.

✓ **Ongoing Support:** Beyond the initial assessment, we can offer ongoing support and optimisation services, via our Managed Security services, to ensure your threat profile monitoring remains aligned with your evolving business needs with proactive, quarterly reviews and reports.
